

ASPISMED

Next-Generation Precision Pharmacology & Patient Safety Ecosystem.

**"Discovering, Validating and Securing Real World
Data."**

— OUR CORE MISSION

Multi-Stakeholder Value

A synergistic model aligning patients, providers, pharma, and payers into a single "win-win" network.

Ecosystem Value Creation

CLINICIANS

Engagement & Loyalty Hub

- Real-time toxicity alerts.
- Increased patient trust.
- IP safeguarding for workflows.

PATIENTS

Personalized Safety Shield

- 24/7 Digital Monitoring.
- Treatment adherence.
- Proactive crisis prevention.

PHARMA

High-Fidelity RWD Assets

- Compliant data licensing.
- Accelerated safety profiling.
- R&D insight generation.

PAYERS

Risk & Cost Mitigation

- Reduced ER readmissions.
- Value-based care delivery.
- Preventable cost reduction.

INVESTORS

Defensible SaaS Scaling

- High-margin recurring revenue.
- Powerful data moat.
- Scalable B2B architecture.

The Clinician Advantage

Fostering Patient Loyalty

ASPISMED acts as a digital bridge between appointments, providing patients with a sense of continuous care and security.

-  **Higher Engagement:** Active participation in treatment reporting.
-  **Loyalty Hub:** Strengthening the doctor-patient bond through proactive protection.
-  **IP Protection:** Safeguarding clinician triaging methods and practice patterns.

The Discovery Engine

Discovering Insights

Empowering Pharmaceutical R&D to identify novel drug-drug interactions and long-term toxicity patterns across diverse populations.

-  Identification of sub-therapeutic or toxic signal trends.
-  Validation of innovative drug profiles in real-world settings.
-  High-fidelity data assets for faster regulatory compliance.

The Validation Engine

Validating Literature

ASPISMED's Clinical Mode correlates published scientific data with the unique physiological profile of each patient.

$$P_{\text{safety}} = \int R_{\text{literature}} + D_{\text{RWD}} dt$$

Moving beyond generic guidelines to **Precision Safety**:
Verifying therapy safety based on actual patient biomarkers
and pharmacokinetic data.

The Security Foundation

Securing Data Sovereignty

Built on a zero-trust architecture, we ensure absolute data integrity and patient privacy through advanced encryption and de-identification pipelines.

-  **Privacy-Preserving:** GDPR & HIPAA compliant pseudonymization.
-  **Audit-Trail:** Cryptographically verifiable, append-only logging.
-  **Sovereignty:** Patient-controlled permissions for data sharing.

Execution & Implementation

A horizontal timeline with three green circular markers. Below each marker is a time period and a description of the phase.

H2 2026 - H1 2027

Funding Injection & Core Application
Implementation Phase.

H2 2027 - 2028

Strategic Collaboration with Pharma &
Insurance Networks.

2028+

Aggressive Expansion & Trajectory towards
Profitability.

Dual-Engine Revenue Strategy

SaaS Licensing

Subscription model for Hospitals & Clinics. Value driven by clinician efficiency and reduced ADR readmission costs.

Data Monetization

High-fidelity RWD licensing for Pharma. Value driven by safety signal discovery and drug validation assets.

Discovering, Validating and Securing Real World Data.

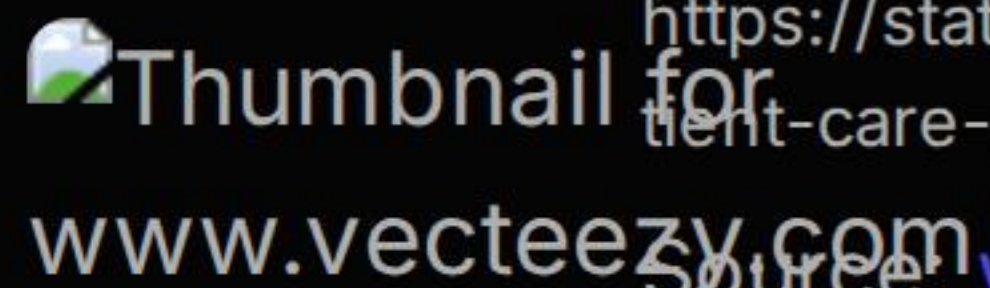

THE NEW STANDARD IN PATIENT SAFETY
